Invented for life

# SUMMER SHOWCASE 2020

Professional audio and communications webinars

The Bosch Communications Systems family of brands offers the world's most complete portfolio of professional audio and communications solutions – **join us for our Summer Showcase and experience our latest innovations:**

- Bosch conferencing and public address
- Dynacord electronics and software
- Electro-Voice loudspeakers and microphones
- RTS intercom systems

**June 22–26**  
Register today [here!](#)

Monday, June 22

10–11 AM CST

**RTS ODIN  
(OMNEO Digital Intercom)**

Where previous-generation digital matrix products were significantly larger and more costly to own and operate, ODIN's feature set and form factor are designed to make a professional matrix solution more accessible and easier to use than ever before, opening up the benefits of highly scalable and interoperable IP-based communications for wide range of new markets and users of all levels.

1–2 PM CST

**Bosch PLENA matrix  
digital sound system**

Flexible and powerful public address with wireless control capabilities, PLENA matrix is all about superior performance in an easy-to-use contemporary package – the go-to choice for background and foreground audio across a wide range of vertical applications, such as fitness centers, hotels, houses of worship, offices, recreational facilities, restaurants, retail, schools, sports facilities, warehouses and more.

3–4 PM CST

**Electro-Voice installed  
sound systems**

EV's extensive portfolio offers line-array, point-source and distributed loudspeaker solutions for consistent performance across any installation, providing system designers with complementary building blocks to address the needs of a wide range of venues and acoustical challenges.

Tuesday, June 23

10–11 AM CST

**Performance space solutions**

An overview of the pro audio and communications system solutions we offer for performance applications, including houses of worship, theaters, sports venues and more. Covers the latest technologies from the brands Dynacord, Electro-Voice and RTS.

1–2 PM CST

**Bosch conferencing  
product portfolio**

Bosch offers user-friendly solutions for meetings of all sizes – ranging from small organizations and regional governments to multinational corporations and international summits – always with the best sound quality, the latest technology and contemporary design. Bosch introduced the first fully digital conference system more than 20 years ago; today we lead the market trend towards fully integrated solutions, where information is shared over standardized infrastructure and interfaces.

3–4 PM CST

**The SONICUE ecosystem**

SONICUE sound system software simplifies the set-up, tuning and operation of professional sound reinforcement systems, with intuitive operation and direct interaction ensured by a comprehensive overview of the entire sound system. SONICUE supports Dynacord C, L, IPX and TGX series amplifiers and the new MXE5 matrix mix engine, and includes a loudspeaker settings library featuring presets for current Electro-Voice models.

Wednesday, June 24

10–11 AM CST

**Bosch CCS 1000 D  
digital discussion system**

The CCS 1000 D is compact, easy to set up and easy to use, yet it provides advanced features and exceptional versatility. Designed especially for quick, plug-and-play installation, it is ideal for small to medium-sized fixed and mobile/rental applications. Cost-effective, with proven Bosch reliability and audio performance.

1–2 PM CST

**Industry standards**

Across our brands and products we work with ALL industry-leading standards, protocols and connection types: AES67, AES70, ST 2110, VOIP, G.711, G.729, G.722, Dante, 4W analog... and more. As a committee member and driver of new standards – including SMPTE 2110-30, SIP, and AES – we're here to share the info that you need to get up to speed on the latest standards and emerging technologies, and how they can work together with existing equipment.

4–4:45 PM CST

**NEW! Dynacord MXE5  
matrix mix engine**

Designed for high-performance applications, the MXE5 is equipped for Dante/OCA audio/control and offers a range of sophisticated features. It delivers the highest audio quality available in a DSP matrix, with superior specifications such as 96 kHz internal processing, the industry's lowest audio latency at >0.22 ms, and a signal-to-noise ratio of 118 dB. A comprehensive Q-Sys plugin is available, so it can be used to upgrade existing systems.

Thursday, June 25

10–11 AM CST

**NEW! Dynacord MXE5  
matrix mix engine**

Designed for high-performance applications, the MXE5 is equipped for Dante/OCA audio/control and offers a range of sophisticated features. It delivers the highest audio quality available in a DSP matrix, with superior specifications such as 96 kHz internal processing, the industry's lowest audio latency at >0.22 ms, and a signal-to-noise ratio of 118 dB. A comprehensive Q-Sys plugin is available, so it can be used to upgrade existing systems.

11–12 PM CST

**Bosch DICENTIS  
wireless conference system**

Conference centers and multi-purpose spaces frequently hold different events, each with different setups and configurations. Thanks to its high degree of flexibility, ease of installation and use of Wi-Fi technology, DICENTIS wireless is perfect for these kinds of applications – especially for where social distancing is required.

4–4:45 PM CST

**NEW! RTS  
wireless solutions**

An overview of the industry's broadest wireless intercom portfolio, with a focus on the new BTR-30N two-channel narrow-band UHF/VHF wireless system. The system's hybrid dual-band design makes it a flexible choice for today's changing and shrinking RF environment – reliable, high-fidelity communications delivered with minimum spectrum usage. New frequency band options for UHF BTR wireless systems will also be covered.

Friday, June 26

11–12 PM CST

**Bosch DICENTIS  
conference system**

The DICENTIS conference system is the revolutionary IP-based platform for today's increasingly integrated conference world, where communications and content are shared seamlessly in sync. The complete line-up – ranging from discussion-only devices to the full-featured multimedia device – makes the DICENTIS product family a superior choice for any type of meeting.
