

Powered, 12" Speaker on a Stick P.A. Speakers

By George Petersen

For decades, the two-way, 12-inch P.A. speaker has been the workhorse of the industry. A single box that's compact and light enough for a single person to easily handle (yet capable of some serious SPL's) makes sense in dozens of situations, as FOH, fills or monitors. And paired with a subwoofer, these systems can pack a sizeable punch. Check out these powered pro speakers with integral pole-socket mounts — perfect for those fast, grab-and-go PA. gigs.
