➤ Defender Products Micro Series 2

An Adam-Hall company, Defender Products' Micro 2 series ensures protection for people and cables with its 3D LaserGrip surface that reduces the risk of an entire cable protector line accidentally moving out of place. Built to withstand up to two tons per 7.8 x 7.8 inches, two 1.4-by-1.2-inch cable runs protect power cables from external influences. Defender cable protectors and ramps are DEKRA certified (DIN 31000, EN 61537), comply with fire protection Class B2 (DIN 4102, B1 also available), meet the Low Voltage Directive requirements and are made from 90 percent recycled material.

➤ JH Audio "Jimi" Custom IEM

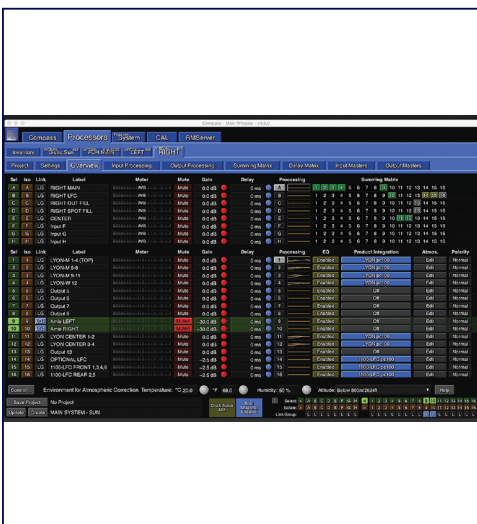

Inspired by legends in rock 'n' roll, the first launch in JH Audio's ICON Series of custom IEMs is Jimi, which features seven balanced armatures, a 7-pin cable design, built-in acoustic sound chamber and Purple Haze — a signature design crafted from wood and resin, with gold logos. Dual-LF, single-mid and quad-HF armatures provide a 10 Hz to 23k Hz response, with smooth bass adjustable to +12 dB. The high purity OFC 4N silver-plated litz wire cable will not oxidize or tarnish and a built-in O-ring keeps the connection between the cable and earpiece dry. Pricing starts at \$1,699.

➤ Meyer Sound Compass Software v4.6

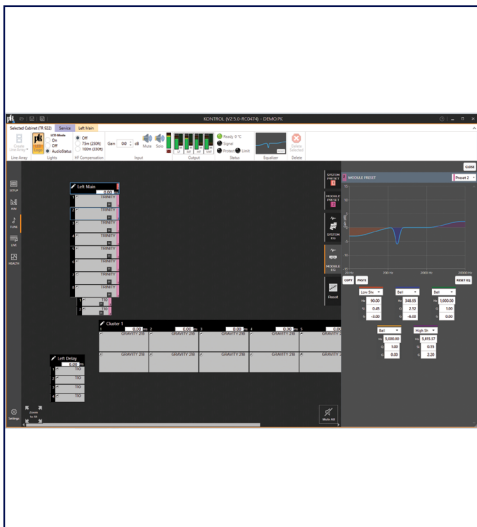

Version 4.6 of Meyer Sound's Compass control software offers full control of Meyer Sound devices, including the Milan-certified Galaxy processors, with new firmware for the Galileo Galaxy network platform processors, CAL beam-steering column array speakers and the RMServer for remote system monitoring. No custom network configuration is necessary; all benefits of AVB networks are retained and the software is available for Windows and Mac platforms. With the software and firmware upgrades, all existing Galaxy processors can upgrade to Milan-certified devices, and future Galaxy units will include the Milan-certified firmware.

➤ PK Sound Kontrol 2.5 Software

PK Sound's Kontrol 2.5 includes an upgraded user interface and streamlined menu system to support tablet and mobile device users. The software gives users the ability to make precise adjustment to PK's products in real-time, including the robotic Trinity and Trinity10 line arrays. Kontrol 2.5 also adds compatibility with the Manual and Install versions of PK Sound's Trinity and Gravity speakers, giving users precise control over their internal DSP. It's available now to all Kontrol users.

➤ PreSonus PM-2 Condenser Mics

PM-2 cardioid condenser mics are offered as a set of matched microphones. Intended for capturing acoustic instruments, drum overheads, stereo Leslie miking and more, each PM-2 microphone has a half-inch (19 mm), gold-sputtered capsule housed in an ultra-light chassis, making it easier to perfectly position your mics without fighting gravity. The PM-2 set includes a stereo bar for X/Y mic placement, and the two microphones can be used together or individually. Street price is \$129.95/pair, including stereo bar and separate clips for each mic.

➤ QSC Attero Tech Synapse D32Mi

The Attero Tech Synapse D32Mi networked audio interface and uniFY Control Panel software update extends QSC's portfolio of I/O peripherals for integration into Q-SYS Ecosystems and other AV systems. The 1U interface provides 32 mic/line analog inputs (on terminal block or DB25) with studio-grade preamps and Dante/AES67 connectivity — at up to 24-bit, 96 kHz analog-to-Dante conversion — with front panel and network control of mic preamp gain, phantom power and muting. Front-panel headphone volume control and source selection enable local input and Dante confidence monitoring at the rack position.

➤ RME Supports Mac OS Catalina

Via free in-house written drivers, all of RME's USB interfaces are now compatible with macOS Catalina 10.15.x. Catalina-compatible devices include Babyface Pro, Digiface AVB, Digiface Dante, Digiface USB, Fireface 802, Fireface UC, Fireface UCX, Fireface UFX II, Fireface UFX+, MADIface Pro, MADIface USB and the MADIface XT. Apps must be fully 64-bit and drivers should be "notarized" as required for operation with Catalina OS 10.15.x. Also, non-USB RME interfaces (PCIe, Thunderbolt and FireWire) have beta drivers now available for download.
